# AKWAMAT 1

*perfect ventilation through natural fibres*

**ENKEV'S AKWAMAT IS THE PERFECT SOLUTION FOR YOUR BOAT, CARAVAN, HOLIDAY HOME AND ANY OTHER PLACE WHERE VENTILATION DOESN'T COME NATURALLY.**

A healthy environment is largely determined by proper ventilation. And that is certainly true in a boat, caravan, camper or tent trailer. Wood, steel, polyester, are with good reason, impermeable to water. These insulating characteristics cause condensation due to the high humidity levels. Akwamat is the perfect solution to this problem. Akwamat allows for natural ventilation of your mattresses and cushions, and prevents moist and mould. There's yet another benefit: The anti-slip surface of Akwamat prevents your cushions or mattresses from slipping. We like to call that a real 'total solution'.

Simply place Akwamat underneath your existing cushions or mattresses. The open structure of Akwamat provides perfect ventilation, keeps your mattress fresh and dry, and makes for a much healthier air quality

Akwamat 1 is made of completely natural materials. From coconut fibers and pure natural latex we make moisture resistant and very resilient mats with an amazingly open structure. These coconut fibres, a by-product of the food industry, are usually thrown away. Enkev sustainably upcycles these materials into high quality products such as Akwamat. A truly sustainable solution, quite befitting the times we live in. Akwamat of Enkev isn't just the best solution when it comes to ventilation, but also the most natural and sustainable solution available today.

# AKWAMAT 2

*perfect ventilation is never straightforward*

Akwamat 1

Akwamat 2

**SIZE:**

- type A: 60 x 210
- type B: 80 x 210
- type C: 100 x 210
- type D: 120 x 210
- type E: 140 x 210

sizes in centimetres.

Akwamat is 15 mm thick.

Akwamat 2 is made of 'Low-density polyethylene' (LDPE). This mat has all the benefits of Enkev's Akwamat 1: It's superbly resilient and has an unmatched wicking quality. Akwamat 2 is easily cut to fit any shape or size, even round.

A great advantage of Akwamat 2 is that it can be used outdoors. The material used is completely water resistant. Cushions on your terrace or boat will dry rapidly after any rainshower with Akwamat 2 underneath them. Akwamat 2 has a light and modern look and feel.

Akwamat 2 is made of completely recyclable materials making it the smart choice when it comes to sustainable solutions.

# AKWAMAT

## **APPLICATION:**

- Akwamat can be easily placed under your existing cushions or mattresses. The open structure of Akwamat provides perfect ventilation, keeps your mattress fresh and dry, and makes for a much healthier air quality.
- Unlike boats, campers and caravans usually don't have a fixed bed configuration. Even in these situations Akwamat excels in its ventilation capabilities. Ventilation holes are often already present. If they are not, don't worry; Akwamat delivers sufficient ventilation at the ends and through the cracks between the table and the benches.
- In trailer tents mattresses are usually located in the lid. In that case you can opt for a slightly larger Akwamat. That way the Akwamat forms a lining on the inside of the lid, freely ventilating due to its slightly larger size. This also applies to the alcove of a camper.
